Discover Freedom from Chronic Pain

Freedom® Peripheral Nerve Stimulator (PNS) System

Chronic pain has a profound personal effect on your life.

Together, with your healthcare team, we provide solutions to support your pain relief journey.

Chronic pain is pain that lasts for over three months and may generate in your peripheral nerves. These nerves are found throughout your whole body, extending into your arms and legs. Such nerves can be injured due to trauma or previous injuries resulting in chronic pain.

Chronic peripheral nerve pain can manifest and affect you personally, preventing you from participating in life's big and little events. The pain you experience is sent from your injured peripheral nerve to your brain, causing you to experience one or more of the symptoms below:

- **Burning**
- **Tingling**
- **Stabbing**
- **Numbness**
- **Aching**
- **Throbbing**

Introducing the Freedom PNS System

A Solution for Targeted Pain Relief

Curonix offers the Freedom Peripheral Nerve Stimulator (PNS) System with an implantable stimulator that relieves pain by sending electrical stimulation to a specific nerve, blocking pain signals from reaching the brain.

The PNS System treats intractable pain by targeting individual peripheral nerves below the head*, providing a long-term approach to help alleviate chronic pain.

Freedom Stimulators are:

- **Cleared for Use in the U.S.**
- **Non-Drug, Non-Opioid**
- **Minimally-Invasive**
- **Typically, an Outpatient Procedure**
- **Full-Body Conditional at 1.5T MRI Scans****

*This PNS System is not intended to treat pain in the craniofacial region.

**For full MRI conditions and product safety information, please see Instructions for Use or visit curonix.com

The Freedom PNS System is designed to seamlessly integrate into your daily life and help you take control of your chronic pain.

Implanted Stimulator

Blocks pain signals to relieve chronic pain.

Transmitter Assembly (Transmitter + Antenna)

The transmitter provides the power to the antenna, which then sends the signal to the implanted stimulator to relieve pain.

PNS Extremity and Torso Wearables

Holds your transmitter assembly and is worn over clothing.

“

The Freedom PNS System has given me my life back. The targeted pain relief to my knee is incredible, and I can finally enjoy multiple activities with my grandchildren that I thought I would never be able to do again.

– Robin, Chronic Pain Patient

”

Your Journey to Chronic Pain Relief

Guiding You Every Step of the Way

We are committed to providing comprehensive care throughout your pain relief journey. Here's an overview of what your journey might look like:

1. **Fill out a Patient Profile:** Share your medical history, symptoms, and goals with your healthcare team, enabling the ability to tailor the treatment to your specific needs.

2. **Meet with your Physician:** Your experienced healthcare professionals will conduct a thorough physical and psychological assessment to better understand your pain, its impact, and determine your candidacy.

3. **Trial Period:** Experience the benefits of the Freedom PNS System firsthand during a trial period—helping assess the therapy's effectiveness for both your physical and psychological well-being. During this time, in collaboration with your healthcare team, you will decide if this device is right for you.

4. **Permanent Solution:** Upon successful completion of the trial period, you will work together with your healthcare provider to discuss next steps. Including, coordination of your permanent implant procedure and how to use the Freedom PNS System, ensuring long-term support and care for your pain relief needs.

As a new patient with a permanent Freedom PNS System, you will work with your Curonix representative to be sized for your PNS wearable accessory — that will hold your transmitter assembly — thus giving you the freedom to seamlessly integrate back into your daily life and take control of your personalized therapy.
